

## Stephen and Sharon Seiden Frontiers in Science & Engineering Forum

The Stephen and Sharon Seiden Frontiers in Science & Engineering Forum was established by Norman and Barbara Seiden in honor of their son, Stephen and his wife, Sharon.

The purpose of the Forum is to showcase Israel's remarkable progress and achievements in science and technology through biennial workshops hosted by the Faculty of Electrical Engineering. The workshops are intended to address the very latest in a variety of disciplines and focus on diverse topics that highlight the Technion's strengths.

The Seiden family connection to the Technion is now in its third generation having started with Norman's father and represents one of the Technion's and Israel's staunchest supporters and greatest champions.
