In 1924, Technion – Israel's first university – opened its doors to thousands of young men and women to build the future of its young nation. Technion is a world-class center of advanced research and learning in engineering, science, medicine, and management. It is Israel's premier scientific-technological research university. Technion graduates are a vital source of Israel’s industrial development, economic growth and national security. Situated on the scenic Carmel Mountains, Technion dominates the Haifa Bay and Lower Galilee.

Visiting academics, international conferences, and exhibitions bring world leaders to create a cosmopolitan atmosphere on campus.
